

## FIBER RANGER FR-110

FR-110 is a fault-event data logger that functions as a feature-down OTDR. Instead of displaying the entire time trace, it identifies the locations and the types of discontinuities, based on a set of pre-determined threshold values, throughout the entire length of the fiber under test. Its portability is ideal for fiber cable troubleshooting, repairing, and restoration. It is light and easy to operate, and often considered to be indispensable for routine fiber network inspection and maintenance.

### Features:

- ✓ Light, compact, portable, inexpensive
- ✓ Display in Simplified Chinese character or English
- ✓ Backlight LCD display
- ✓ Membrane keypad ideal for fieldwork
- ✓ LED indicators for battery charging, and LD lasing status
- ✓ RS-232 port
- ✓ Built-in Ni-MH rechargeable batteries to last for 10,000 continuous measurements
